-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claims 9, 12, 13, 17 and 18 is withdrawn in view of the newly discovered reference(s) to height relative to wire diameter. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Ano (USPN 6815836 B2).

Ano teaches a method of wire bonding by forming a bond at a first bonding point and moving the tool away from the first bond, forming a kink and loop in the wire having a curved portion wherein the tool is moved substantially vertically upwards and toward the second bonding point (figures 4A-4F, col 5 lines 18-65 and col 6 lines 30-37). The wire diameter is less than 1 mil (~25 micron or .98 mil) and at approximately the same height as the first bonding point (figures 2 and 3 and col 3 lines 33-44). The wire loop

comprising a ball bonded base portion, a neck portion, a curved portion which twists in a direction substantially transverse to the vertical axis and a wire extending in a horizontal direction at substantially the same height as the top of the base portion (figures 3 and 6).

4. Claims 10, 11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Takahashi (US 2003/0166333 A1).

Takahashi teaches a wire bond comprising a ball and neck portion from which a curved portion and wire stem protrude in a horizontal direction at substantially the same height as the top of the base portion (figures 9 and 10).

5. Claims 10, 11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (US 2004/0080056 A1).

Lim teaches a wire bond comprising a ball and neck portion from which a curved portion and wire stem protrude in a horizontal direction at substantially the same height as the top of the base portion (figure 7 and paragraph 28).

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nomoto et al. (USPN 649773 B1), Kanda et al. (US 20040115918 A1), Komiyama et al. (US 2002/0047213 A1) and Fujisawa (US 2004/0104477 A1).
